Pew Old Members Hold Ranking Positions on Practically All Important Committees—If Rules of Seniority Are Followed Each Can Pick a Chairmanship and at the Same Time Hold Second Place on Others.

Washington, Nov. 29.—Control of the important committees of the senate in the next congress, when that body will be under Democratic domination, has become a question of pressing importance. The matter is considered vital to the shaping of legislation and Democratic policies in the new congress. It is thought some sort of a Democratic caucus will be held next week to take preliminary steps toward reorganization.

The issue practically has taken the form of an ultimatum from the newer Democratic senators, in which number are included many of the most active members of that body, that they must have their share of the important committee places or they will overturn the established order of seniority that has long been the bulwark of "old members control" in the senate.

The senate committees not only exercise a practical control over all legislation of congress, but they will control no little patronage.

READY FOR TARIFF REVISION.

Men Who Will Shape Legislation Next Spring Declare They Will Work Schedule by Schedule as Proposed In the Underwood Bills-Progressives of Senate Favor Caucuses.

By ARTHUR W. DUNN. Washington, Nov. 29 .- [Special.] - As there is no speaker to elect and no parliamentary business requiring their attention, congressmen have generally delayed their return to Washington for the coming short session. Many of them have remained home until after Thanksgiving and will probably not bring their familles here until after the Christmas holidays. Such members as have come to Washington do not expect any important legislation at the short session. The fact that the extra session has been announced has made it possible to let everything move slowly during the next three months.

Schedule by Schedule, Men who are in a position to shape egislation assert that the tariff revision next spring will be schedule by schedule, as proposed in the Underwood bills which were put through the house in the Sixty-second congress. In that event it is expected that the new bills will not differ materially from those which were passed heretofore, although it was generally understood that if those bills were to become laws there would be considerable modification of their provisions. For instance, it is now considered impossible to pass through the house. It is not believed that a sufficient number of Democratic

CONGRESSMEN LINGERING HOME

Many Delaying Return to Washington For Short Session.

READY FOR TARIFF REVISION.

Men Who Will Shape Legislation Next Spring Declare They Will Work Schedule by Schedule as Proposed In the Underwood Bills-Progressives of Senate Favor Caucuses.

By ARTHUR W. DUNN.

Washington, Nov. 29.-[Special.]-As there is no speaker to elect and no parliamentary business requiring their attention, congressmen have generally delayed their return to Washington for the coming short session. Many of them have remained home until after Thanksgiving and will probably no bring their families here until after the Christmas holidays. Such members as have come to Washington do not expect any important legislation at the WANTS BIG APPROPRIATION short session. The fact that the extra session has been announced has made it possible to let everything move slowly during the next three months.

Schedule by Schedule.

Men who are in a position to shape legislation assert that the tariff revision next spring will be schedule by schedule, as proposed in the Underwood bills which were put through the house in the Sixty-second congress. In that event it is expected that the new bills will not differ materially from those which were passed heretofore, although it was generally understood that if those bills were to become laws there would be considerable modification of their provisions. For instance, it is now considered impossible to pass a free sugar bill, although it may go through the house. It is not believed that a sufficient number of Democratic votes can be obtained in the senate.

The real progressives of the senate, who are in a large majority, favor caualties have occurred thus far among cuses on every important matter that is to be taken up in the next congress. They feel sure that the progressive element will control by about three to supposed conservatives. "My idea, said one of the progressive Democrats. "Is to take everything into caucus and if any man refuses to abide by what two-thirds of the caucus decides to do as a party measure declare that he is

TRUANT LAW IS EXPLAINED

Supt. W. C. Cobb Defines Child Labor and School Attendance Laws

THE THANKSGIVING HOLIDAY

Principals and Teachers Making Ernest Efforts to Secure Good Attendance

Last week the truant officer and deputy labor commissioner commenced a general round up of the city in the interest of the state laws chief justice. Simultaneous with pertaining to school attendance and this announcement came also the child labor. Mr. Pippy was called out of town before completing his rounds but will resume his canvass Ramsey county district bench in itt represents Hohman, who was sucagain on his return.

For the benefit of those who may not be familiar with the state law pertaining to child labor and school attendance, we append the following from the revised pamphlet issued by the State Department of Labor, June,

"It shall be unlawful for any person, firm or corporation, to employ rooms. Parents are asked to coany child under 14 years of age in any business or service whatever dur- efforts to secure good attendance, which is the subject-matter of this ing any part of the term during which | which bears so direct relation to lawsuit, died on or about the 26th of the public schools of the district in good work and promotion. Attention is called to this last section particularly because application is made so frequently for a certificate to work on the ground that the parents need the financial assistance. The state law is very explicite on this point as the legislature at its last session provided that no certificatees for employment should be issued to children under 16 years of age unless they had completed the 8th grade of the common schools, it evidently being the intention of the legislature to give to every child in the state, regardless of poverty conditions, an opportunity to receive a common school education.

It would greatly facilitate in the enforcement of the above laws if all employers of child labor would consider the two essential facts before offering such employment, viz; Is such child over 16 years of age, and if not, has he completed the common school course.

The schools will close for the State of Ohio, city of Toledo, Lucas County, ss. It was an excellent issue, especially valuable to those interested in the Cuyuna range."
